

FIRST INTERNATIONAL MEETING

on FRANKINCENSE and MEDICINAL PLANTS

Under the Auspices of H.E. Sayyid Mohammed bin Sultan Al-Busaidi
Minister of State and Governor of Dhofar

Thursday, 26th October, 2017
Conference Hall,
Dhofar University, Salalah, Oman

The First International Meeting on Frankincense and Medicinal Plants brings together the renowned experts and researchers in the field of Frankincense and medicinal plants' research from all across the world. Dhofar region is enriched with Frankincense and over 250 reported species of medicinal plants that could play a role in treating some of the world's current and future diseases. Our aim is to focus on Research and Development of Frankincense and Medicinal plants by transferring knowledge to industry. We also hope that this event shall provide opportunities to researchers, experts, clinicians, chemists, pharmacologists, local growers and entrepreneurs to discuss recent developments in the field of secondary metabolites like gum resin, essential oils, alkaloids, flavanoids etc. extracted from local Dhofarian plants. It also offers a great opportunity to introduce delegates to new developments and breakthroughs in many disciplines related to Frankincense and medicinal plants research. The objective is to strengthen the status of Frankincense and some other medicinal plants as an important part of the world's cultural heritage.

COULD PLANTS BE A CURE??

Exhibition

The meeting provides a unique opportunity to international and local companies, Research institutes and commercial agencies to exhibit their services and products in an exhibition. It will provide them a favourable environment to meet potential customers and market their products.
