The Research Electronic Submission System (TRESS)

access The Research Electronic submission system

The Research Electronic Submission System (TRESS) facilitates for researchers the opportunity to submit research proposals in areas allocated by TRC, with the ease of applying through online access and tracking the evaluation of the proposal. Researchers from institutions affiliated with TRC are privileged to use the TRESS platform. Those who are not associated with the affiliated institutions may urge their institutions to submit an official request to join. A list of current institutions is available when accessing the system.

Any non-affiliated institution with a number of researchers employed may submit a request to join TRESS.

TRESS is also used by those who are evaluating the submitted research proposals, such as the grant committee, peer reviewers and institutional focal points. The members of the grant committee are nominated by The Research Council.
